PROFILE

Motivated and detail-oriented Software Engineering student with strong skills in both frontend and backend development. Passionate about building reliable web applications and solving real-world problems through clean, efficient code. Eager to learn new technologies and contribute to collaborative, agile teams. Strong foundation in Java, MySQL, and modern web technologies.

PROJECTS

- **Liyu mended bego adragot**
 - Dedicated and creative Software Engineering student with strong skills in HTML, CSS, JavaScript, PHP, Python, and React. Recently contributed to the development of liyu mended bego adragot, a web-based charity platform focused on helping vulnerable communities. Experienced in building dynamic, user-friendly websites from scratch without using frameworks, and passionate about creating technology that makes a positive social impact. Strong team player with a problem-solving mindset and eagerness to learn and grow in real-world projects
- **Hotel Mngement System**
 - A full-stack web application developed collaboratively to streamline hotel operations including room bookings, customer management, and staff dashboards. Built using HTML, CSS, JavaScript for the front-end, and PHP with MySQL for the back-end. Emphasized responsive design, real-time data updates, and user accessibility for staff and administrators.
